Spare Parts - Jets

Identify the jet you require using the measurements and diagrams below. You should be able to easily remove the jet in need of replacement by turning it anticlockwise.

Comparable jet sizes are interchangeable to give you more versatility, ie. each of these small jets can be moved to any other small jet position, as can the medium and large be moved into any other position with the same size jet.

large directional
125mm diameter

medium directional
90mm diameter

small directional
80mm diameter

cluster
55mm diameter

large twin spinner
125mm diameter

medium twin spinner
115mm diameter

small twin spinner
80mm diameter

pulsator
55mm diameter

large massage
125mm diameter

medium massage
115mm diameter

small massage
80mm diameter

air massage
40mm diameter

neck jet
65mm diameter

medium single spinner
90mm diameter

small single spinner
80mm diameter

water massage
40mm diameter
