

# mySpa™ by Sapphire Spas

## Protect your investment by asking

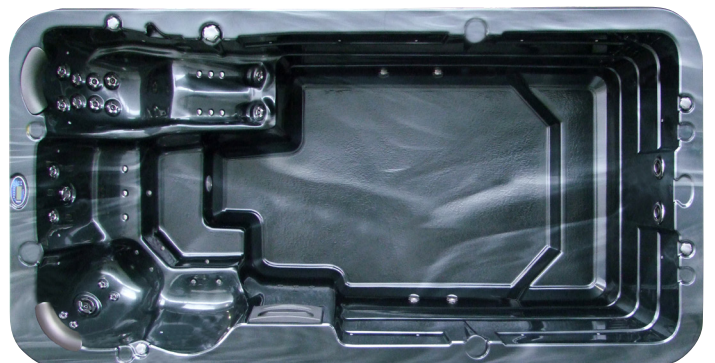

- where is this spa made?
- is it 100% Australian made?
- can I see the spas being made - you are welcome to visit Sapphire Spas manufacturing plant
- is it imported?
- why do resellers make Aussie made claims?
- shouldn't they be proud of their imported product?
- who honours the warranty?
- if it's the retailer, what if they shut shop?
- who do you call for service or technical support?
- why is the spa cheap?
- have they used cheaper components?
- can I look inside the cabinet?
- is the stereo just a glorified car radio? It should be a reliable waterproof stereo system.
- is the lighting off a Christmas tree? 1 bulb out, no spa lighting!
- how much does it cost to run? You don't want an unmanageable power bill in years to come.
- do they offer all heating options? gas, heat&cool pump, electric or solar.
- have I had any previous issue with an imported product, ie. 'made in china'?
- it looks the same, but does it perform and last the same?
