

liquid&light effects

underwater perimeter lighting - LED perimeter chain lighting has been subtly positioned beneath the waterline to supply an elegant ambience to your spa pool and outdoor entertaining area. Multi-coloured LED beams of light produce a fluent display as they interact with the movement of water and bubbles within your spa.

kaleidoscope full lighting system - perimeter chain lighting & topside LED lighting supply an elegant ambience to your spa pool and outdoor entertaining area. Backlit water features, touch pads and topside controls blend a kaleidoscope of colours in time with the LED lights positioned beneath the waterline.

iPod fluid dock underwater surround sound - with new transducer speakers for underwater surround sound. Place your iPod in the waterproof docking station and enjoy complete control via your spaside touchpad. Transducer speakers produce optimum clarity as the sound waves are fed through the spa shell and amplified by the volume of water. Wireless bluetooth connectivity provides access to all your favourite tunes from any compatible device.

fluidscent aromatherapy - takes advantage of the benefits to be gained from holistic therapy. Open the air injectors and millions of tiny bubbles, infused with essential oils are released through the air massage jets of your spa.

cabinet lighting - a little atmosphere for those who haven't jumped in yet. Your spa will become the centrepiece of your backyard landscape design. External led lighting highlights the natural beauty of the spa cabinet and integrates perfectly with the spectacular in-spa display.
